

Ukiahi Class of 1966

Shirley Ann Brunt Hall

Wow, our 60th class reunion! It's hard to realize it's been this long since we were all together at graduation. Unfortunately, I have not been able to attend any of our class reunions. However, I feel extremely blessed to have stayed in touch with my dear classmate and friend, JeAnne Egan Barrett all these years. A few years ago, JeAnne and Doug also moved to Oregon. My husband and I have lived in Oregon since moving here in 2000.

We feel very blessed to have our son, our daughter and Son-in-law and our 3 Grandchildren all here in Oregon. Our precious Grandchildren have all graduated High School and are off to college! 1 at Law School, 1 a Senior graduating next year and 1 a freshman. We are very proud Grandparents! It has been a true joy to watch their sporting events, share our holidays and special occasions together with our family!

Life is good and retirement is great! We survived having Covid twice and Richard and I are celebrating our 59th wedding anniversary. God is Good! Have a great 60th Class Reunion!

Sincerely,

Shirley Ann Brunt Hall

Georgia Butt Smithwick

Oh my 60 years! Time has gone way too fast for me. Roger and I have been married for 56 years and are still living in Texas and the same house that we raised our family. My sons, Roger 49, has 3 children Rebecca 29, Dylan 22, and Liam 17. Peter 47, married with two boxers, Axel and Fergie.

Have had some medical issues in the past years but have overcome them and try to stay as active as possible. Really enjoy my yard, reading, traveling and camping with the kids. My kids don't mind me hanging around with them and we have so much fun when we are all together. Unfortunately my husband's health isn't the best so he is unable to be with us on our excursions.

Always excited about seeing my classmates but this time I will not be attending. Our classmates have always been so special and some of us have known each other since kindergarten. It saddens me of how many friends are now gone. So to those classmates that will be attending, have a great time!

Love y'all
Georgia Butt Smithwick

Bill Brister

What I have been doing since graduation 60 years ago:

I started college at Cal, married Barbara Bailey, a Ukiah girl, class of 1962, during the summer. I then transferred to SRJC and commuted daily for my second year. I decided to become a petroleum engineer, so we moved to Norman, Oklahoma and I graduated from the University of Oklahoma year end 1970. I began working for Continental Oil Company in New Orleans, La. as a petroleum engineer in January 1971. Our two sons were born in New Orleans, Mike in 1972, and Jeff in 1974. I worked for the same company for 32 years and retired at 55. I did some part-time consulting for a couple of years then fully retired.

Working for an oil company is a lot like being in the Service. You are never in one place for very long. Following is list of all the places we lived during my 32-year career:

New Orleans, Houston, Sicily, Norway, Dubai, Midland, Tx, back to Dubai for 3 years, Lake Charles, La, New Orleans again, Houston, Casper, Wy, Anchorage, Ak, Lafayette, La, Houston again, where I was managing worldwide exploration drilling and production and New Venture operations in New Zealand, Azerbaijan, Vietnam, Malaysia, Syria, Nigeria, and Libya. Got in a lot of air miles but did spend one year rotating in Vietnam as President of Conoco Vietnam but Barbara stayed in Houston. We remained in the Houston Area after I retired and still live in the last house we bought when I was working. We had a 40 ft motorhome, and chased the NASCAR circuit, but I recently sold it. Getting too old to wrestle it around. Now just trying to stay upright. Looking forward to seeing everyone.

Ron Eversole

After high school, I studied Mechanical Engineering at UC Davis followed by a 2-year MBA program at Rutgers University in downtown Newark, NJ. I was looking for a change and found it going from rural Davis to an urban city in decline in the early 1970's. After graduation, I lived in White Plains, NY and traveled around the country implementing computer systems for the Nestle Food company for 2 years.

I returned to sunny California in 1974 and lived in Oakland working for Kaiser Health Plan for 2 years followed by 10 years at a Crown Zellerbach subsidiary in San Francisco. The job included several years of traveling to Portland, Seattle and Los Angeles to implement computer systems then manage companywide IT systems.

After CZ, my first Silicon Valley job was a small electronics distributor in San Jose for a few years. Then Apple Computer (1988-1996) during a huge growth period after Steve Jobs left the company. Apple culture was "the boy scouts without adult supervision" so being over 40 gave me more respect than I had earned from peers in their mid-20s. It was a fun, high energy, "change the world" environment that was usually all consuming. I left when they were declining and expecting to "turn out the lights" soon. However, Steve Jobs came back and saved them.

I worked at a small computer networking systems company for a few years then started at Hewlett Packard in 1998 to prepare for Y2K. I had always wanted to work for HP! I worked with a lot of talented engineers and skilled peer IT project managers doing large IT system upgrades, migrations and support until 2012 when I took an early retirement package. Then I spent a few years doing HIPPA consulting.

Starting in 2014 until now I fell into being a landlord, which is mostly being a handyman with secondary tasks of accountant and legal clerk. We use the opportunity to spend a few months a year at our rental house in La Quinta (near Palm Springs) and a month or so in Ukiah.

We have seen the west coast in our travel trailer, have taken multiple cruises and trips back east to visit friends, Jane's class reunions and relative's weddings.

I married Jane Henderson in 1987. She is from a town in Pennsylvania about the size of Ukiah. She is a Physical Therapist from University of Pittsburgh and has a master's degree from San Jose State. We sold our respective houses in Oakland and Castro Valley to buy our current house in Castro Valley in 1988. It turns out that engineers and physical therapists share a lot of skills and interests.

Our daughter Jill was born in 1989. She attended UC Santa Cruz and earned a Master's in Public Health from UC Berkeley. She married Tanner Johnson in

Ukiahi Class of 1966

2023. They live in Sacramento and she works in health care education management for the state of California.

Ron Eversole continued

Our son Ben was born in 1992. He attended Columbia University in NYC and earned his law degree from UC Berkely law. He married Mary Love in 2025. They live in San Leandro not far from us in Castro Valley. He is an employment lawyer in San Francisco.

My hobbies before marriage were sailing in the San Francisco Bay and racing sports cars at race tracks in Sonoma and Laguna Seca in Monterey Bay. I was also a (volunteer) race car driving instructor for the Sports Car Club of America (SCCA).

We find connecting with old friends from high school and college is one of the pleasures of being retired. I am looking forward to seeing old friends at the reunion.

Ian Seaton
Freelance Wonderer

I find blissful comfort on Lakeview Drive most days
Having reached an age when destination anxiety
No longer usurps hereeness and nowness
No longer obscures
The lush explosion of green
Heavy with dew and rain-shined leaves
Weighing long limb arches over both sides of the road
Calling to mind the drive beside the Navarro River
Through redwoods to a steelhead fishing hole
The sound-sucking silence of soft thick bark and ferns
The ubiquitous pain nurtured on crimson cold ears and frozen fingers
The persistent smell of salmon roe
The uncooperative fingers repeatedly failing
To tie on new leader
The agony of restraining a greasy-breakfast turd
Fear of filling up hip boots with shit during a woodsy squat
No longer obscures
Sun dappled pavement
Three dimensional dapple beams strobing windshield
Bright tree tops and sky emerging from hood
On descent from curved crest
Calling to mind the Monday morning drive
Trash pick-up along Eel River fish camps
Rusty fifty gallon barrels
Beer cans fish heads and yellow jackets
Some have to be team-lifted
To clear the tailgate into the truck bed
Some dozen stops and then the dump deposit
And then sitting on the tailgate for lunch
With a floor show of rats and snakes
No longer obscures
The twisted winter skeletons
White oak red maple sweetgum
Death moats around random loblolly pine
Still impenetrable except to the eyes
Which catch swamp glimpses of deer and blue heron
Calling to mind Christmas breaks with the in-laws
The drive through the Russian River canyon
Letters to Santa soothing through the radio on KUKI
Afternoon walks through the old neighborhood
Adjacent to downtown
And the tangles of lilac lantana butterfly bushes spirea

Ian Seaton continued

Twig thickets separating houses
Returning to a garage of multiple cases of champagne
Cold enough to open and serve
So whenever a soap opera or game show was on TV, or wrestling
Whenever the dogs were barking or peeing on the floor
Or whenever something else happened
The third generation emptied bottles out in the garage
And stayed too drunk to drive for the week
In place of the TV they got yelling and slammed doors
Missed meals indignant tears thrown dish towels
I am not nostalgic for bologna sandwiches eaten
With cold fish-smelling fingers
And the make-you-believe-in-God fear
Of shitting your pants
I am not nostalgic for the smell
Of full fish camp garbage cans
Like somebody shit on a pile of kimchi and rotten broccoli
I am not nostalgic for alcoholic armor
Protecting us from each other and ourselves
And no memory
Of a one hundred ninety two hour conversation
These cannot be the associations
That agitate my whole being
Turning onto Lakeview Drive
Like seeing the lady naked and beckoning
Those places themselves are beautiful
But it is beautiful where I live now
When I was eating canned mustard sardines for lunch
I still believed I could start making jump shots
Or scoring touchdowns
And get a scholarship to go far far away
When I was eating lunch at the dump
I would be starting college that fall
A chance to start over being an idiot
One person at a time
When I was an inebriated holiday survivor
I was teaching college English
And preparing to start my PhD classes
Big city with witless protection program
Most of these opportunities never got used up
And now at an age when opportunity opportunities
Shrink to fit the available time
When I turn onto Lakeview Drive
I at least experience the visceral penumbra of opportunity.

David Alexander

My overall health is very good but I have fallen 6 times in the past two years. I got a ride to the ER twice but I recovered quickly. Now I walk with a cane and keep a close eye on what is on the ground ahead of me. Two years ago I moved from a two story condo to a ground floor unit still in Santa Rosa. I love it plus it is next to a park which I walk around twice a day. I am still traveling and now am able to visit my favorite destination of Jamaica twice a year. I gave up my sailboat in 2021 after a leak allowed saltwater into the transmission. I sold the boat for a dollar and let someone else repair it.

I don't miss it as I have lots of photos and memories of sailing on San Francisco Bay. I still have a social life at the Ballena Bay Yacht Club in Alameda and serve on the board of directors.

My book, "Never Wait for the Fire Truck" is still on Amazon and nets some sales every month. I have been asked to translate it into Spanish as people in Spain and the Canary Islands have asked for that. This next March 27th will be the 50th anniversary of the Canary Islands aircraft accident so there may be some coverage in the media.

I hope that you all are having fun Too!

Richard Branson

I was born and raised in Ukiah until my family moved to Sacramento mid way of our sophomore year.

I met Shelly Cook in 1966 and we dated for four years before getting married in March of 1970:56 years and still having fun!

Graduated from UC Davis with a BS degree in Agriculture Economics in 1970. The same year I started my career with Diamond Walnut Growers Cooperative in Stockton California as the Sacramento Valley Grower Relations Fieldman. Shelly and I moved to Stockton and started our family. We have two daughters, Stacy and Denise. We have two grand sons 19 and 17 years old and enjoy watching any sport they are playing.

In 1980 I received an MBA and joined the marketing department of the newly formed Fortune 500 company of Sun-Maid, Sunsweet, and Diamond Walnut Growers, named Sun Diamond Growers.

In 1985 I left Sun Diamond with my marketing mentor to form a new company Pacific Ingredient Exchange (PIE), which became the natural ingredients supplier to start-up companies Clif Bar, Power Bar, and others.

My Partner passed away in 1991 and Shelly became my partner. In 1997 we moved family and business to our new home in Aptos California.

Shelly and I retired in 2018 and turned our business over to our daughter Denise and her husband David. Stacy purchased a retail clothing and beach accessories shop on Stockton Ave in Capitola Village where she enjoys life with her little shop dog, Vinnie.

In retirement we enjoy our family being close by and visiting often.

Robert Broaddus

After graduating from Ukiah High School in 1966, I attended junior college, earned my associate degree, and received Federal Aviation Administration Aviation Maintenance Technician licenses.

In January 1969, I entered the U.S. Army for basic and advanced training. That July, I deployed to Vietnam, where I spent 14 months in combat as a helicopter crew chief and door gunner.

In early 1971, I returned to school and completed my college education at Sacramento State. Returning to campus after Vietnam was difficult. In 1973, I began working as an aviation maintenance technician. I later earned single engine and multi-engine commercial pilot licenses with an instrument rating, worked part time as a corporate pilot, and served as Director of Maintenance for two fixed-base aviation operators in Santa Rosa, California.

In 1987, I joined REACH Air Medical Services as its first on-call aviation maintenance technician. In 1988, I began working for United Airlines and retired after 15 years of service. I continue to hold United travel benefits and look forward to using them more in retirement.

After retiring from United, I returned to REACH Air Medical Services, LLC, where I served as a technician and later became Director of Maintenance and Chief Maintenance Inspector for operations across the western United States. I retired in late 2017.

I am blessed with two daughters. My oldest daughter, Carly, is married and serves as a sergeant in the motorcycle unit of the Vacaville Police Department. My younger daughter, Allison, is also married, and she and her husband both work for Keysight in Santa Rosa, California.

In 2015, while vacationing on Oahu, I visited the Pearl Harbor Aviation Museum on Ford Island and discovered the actual Bell Huey UH-1H helicopter, number 68-16411, that I had flown in combat as a crew chief and door gunner. My second Huey helicopter. After my visit, the museum restored the helicopter in my unit's markings. Through that discovery and the museum's ["The Mystery of Huey 411"](#) blog, I later reconnected with

several former crew members and others from my Vietnam unit. My Vietnam service has also been preserved in the Library of Congress through a [personal narrative collection](#).

In retirement, I have traveled across the United States, camped along the West Coast, and spent time working through the family history files I inherited. Enjoying my retirement.

My Educational Journey in Ukiah

By Karen (Long) Moon

Before I start this story I need to give a little historical background information. In the 1952 school year Yokayo Elementary School was located where the Ukiah Civic Center is today. Pomolita Middle School was located on Dora Street on the campus where Yokoyo Elementary School is located today, and Ukiah High School was on the grounds where Pomolita Middle School is now located.

I started kindergarten in 1953 at Yokoyo Elementary School and Mrs. Hann was my teacher. In 1954, there was an overflow issue in the district, so first grade was held in the Presbyterian Church on West Perkins Street. My first grade teacher was Mrs. Clark, and each day our teachers would walk us three blocks to Yokayo Elementary for lunch.

I started second grade in the Fall of 1955 at Nokomis Elementary School, the first year it opened, and Mrs. Hiatt was my teacher. There was no landscaping or play ground equipment at the school so during recess we would look for arrowheads, played jacks, marbles, jump rope and chased each other around. I attended Nokomis second through sixth grades. Today, if you were to stand in front of the school facing south, my Blue Bird group planted the three trees on the east side of the driveway. Those trees are still there today.

I went on to Pomolita Middle School and Ukiah High School, graduating with the class of 1966. A couple of years later, I was married and had two children, Dena and Jamie Finn. In 1982 I was divorced, and became a single parent raising two children.

I was employed at Saving Bank of Mendocino County for 18 years. I met John Moon in 1986, and we were married in 1989. In 1993 I left my position at Savings Bank, and enrolled in Mendocino Junior College. After receiving my A.A. degree I moved on to Sonoma State, taking night classes here in Ukiah. I received my B.A. degree in 1997 and, then enrolled in Dominican University of California taking satellite classes at their Talmage campus. One year later, at the age of 50, I earned my teaching credential. My elementary school alma mater, Nokomis Elementary, had an opening for a third grade teaching position. I went through the interview process and was offered the job by the Principal, Bob Frazinello.

I taught both second and third grades at Nokomis for 17 glorious years. I taught in Room 17 for 17 years, and then retired when I was 67 years old. I have never regretted getting my teaching credential; teaching was always my passion.

Ann Bruton Parks

I've had some big changes in my life since the last class reunion. I finally sold my big house (3500 square feet) in February 2025 and moved to Harold Square Mobile Home Park on East Gobbi St. It's a small manageable house two bedroom two bath with a nice little yard. Pretty happy here.

In April 2026 I had my right hip replacement and I'm doing quite well. Now easily walking with a cane. Recovery has been fairly easy. So you wonder what I've been doing with my life besides that? I am still doing some sewing machine repair, people continue to find me and so it's a little money on the side. It gives me something productive to do.

My six kids are doing pretty well for themselves. My oldest Scott lives in Maui, Hawaii is married and my only grandchild will be 13 next March. I don't get to see her very often but hope to plan a trip this next year.

Son Michael, former chef, lives in New Mexico and has started a new business making Habanero hot sauce. Quite tasty I must say.

Patrick and Tim still live in Ukiah and Redwood Valley keeping busy with their lives.

Daughter Brooke lives in Ukiah and is currently working for the Ukiah Unified School District as a teacher aide, and works partime at a local Smoothie shop.

Raj still lives in Santa Rosa with his wife. I've been enjoying the concerts of the park this summer and get it in a little chance to dance and see friends. I'm looking forward to the class reunion to see all of you.

Love and hugs to you all... Keep Dancing!!

Larry Laing

60 years! Out of those years I've been with my wife 59 years. We have traveled up and down the United States several times in our RV and even adventured to Mexico a few times in it. We have also traveled to the Caribbean several times. We have many memories of our journey in life together.

We have one son 3 grandkids and 5 great grandkids. I have been retired from State of California division of State Architect for many years. Our happiest memories and Joy is with family.

The pictures are from one of our favorite places Grand Cayman.

Martha Burton McCoy

I spent most of my career in Elder care as an Administrator at Elder Care Facilities working with people from all walks of life. There was never a dull moment and I absolutely loved it.

I met my husband, Howard McCoy, in 1984. We were in an on again off again relationship for about 15 years and married for 23 years when he passed away in 2023. Life was always interesting with him. Besides being my husband he was also my best friend and soul mate. I miss him.

In 2012 we decided to take a trip across the United States. We headed out with a little Toyota pickup and a 13 foot travel trailer. We had put everything in storage and thought it would take us about 7 or 8 months. After we had been traveling for 18 months we were in Upstate New York and decided to head back to the South to either get a job as volunteers for the Army Corp or Engineers or go back to California. We started volunteering at a Corp park in Arkansas. We were able to spend the next almost 10 years living on the River meeting a lot of interesting people and having the pleasure of working with the nicest people possible. They have become like family to me.

In 2020 we moved to Sallisaw Oklahoma and went surrounded with more people that are like family. The people in the South are very different from other places. They are always respectful and willing to help anyone. I love it here. These people helped me survive losing my husband and landing on my feet.

These days I'm enjoying my life surrounded by people that love me. I attend a church that is between the horse barns and the race track on Cherokee land. Our pastor is a farrier by trade and has been late to service because he was delivering a lamb. I like not having to be consumed by what you wear. As long as your there you are like family. I am very involved with the American Legion and am honored to be able to do my part for Veterans.

I'm an active and enthusiastic member of the Red Hat Ladies. For those of you that aren't familiar with the Red Hats we are a group of old ladies that are dedicated to laughing and having a good time always. We get together at various venues and sing, dance and play.

I also belong to a crochet club that wear Tshirts that say We're Hookers, get it? Crochet Hooks!! I joined that club so I could get one of those shirts and be able to go to Walmart with my son wearing it. That's always fun. So far all I can crochet is a long squiggly snake. Lol!!!

I have been looking forward to this reunion for a long time. I know it will be a great time.

Love,
Martha Burton-McCoy

Ukiah Class of 1966

Bill Karbe

Hard to believe it's been more than 60 years since we walked down the wind tunnel to the football field for our Ukiah graduation. Since then I've lived in Santa Rosa, Chico, San Rafael, San Francisco, Walnut Creek, Woodland and now Davis — but I've always enjoyed coming home to the Ukiah valley.

It's also hard to believe it's been 18 years since I retired from PG&E after 36 years and two very enjoyable careers. After the San Bruno gas explosion I went back on contract for five more years, working property damage claims.

When I finished working in 2014, I started riding with a road bike group that I now lead. I'm involved with two other groups as well, so I'm typically on the bike four days a week. It's the most enjoyable thing I've ever done, though I still make time for golf and fishing. I've been lucky enough to take several cycling trips to Europe — Puglia and the Dolomites in Italy, Provence, Switzerland, Germany, Portugal and Spain — with memorable side trips to Rome, Venice, Paris and Lisbon. Next May we're signed up to ride in Slovenia, Austria and the Italian Alps. When I started riding 12½ years ago, I set myself a lifetime goal of 100,000 miles. Only 19,000 to go.

My wife, Vernice (Class of '69), and I celebrated our 50th anniversary last year with a wonderful 14-day Viking cruise to Alaska. My youngest daughter and I have also taken some fun road trips — the Grand Canyon, the Tetons and Yellowstone — and we just got back from exploring the waterfalls in the Columbia River Gorge.

Once the cooler weather arrives in October, I'll fire up my scroll saw workshop again. I love working with wood. Send me an email (bill_k9@hotmail.com) with your home address and two names — yourself and your spouse or special someone — and I'll send you personalized key chains cut from ¼" walnut. They work best with seven letters or fewer, so nicknames are welcome. I've made hundreds of these.

Hope to see you soon. Cheers.

Linda Hull Thompson

Sixty years, wow!

Spouse: Gordon, passed away in 2015.

Children and their spouses: Martin & Deborah Thompson, Dave & Deanne Fisher

Grandchildren: Megan 25, Kathleen 24, Ethan 22 and Tatum 19

Great Grandchildren: Luka 3, Eliah 23 months, Simon 22 months, Talia 7 months, and Christopher 6 months.

The first 17 years of our marriage I was a stay at home Mom that did a LOT of volunteer work at Oak Manor School, 4H and the Mendocino Historical Society. Later when we moved north, I carried on the volunteer tradition to include Jacoby Creek Elementary School, the Genealogical Society 4H again in Humboldt County. In fact so much volunteer work that once my children were in high school I decided if I was going to be gone all of the time maybe I should get paid for awhile. I got a job at the Humboldt State University Bookstore where I spent the next 27 years.

I held various positions in the Bookstore, but spent most of my time there as the Computer Department Manager. It has been a very interesting job that allowed me to learn a huge amount and do quite a bit of US travel. I have I served as the Chair of a national organization. I retired as the Bookstore Director in 2011.

I love the work I do for my church. Where I serve as Financial Secretary and Treasurer.

I like to spend time at Trinity Lake whenever possible during the summer. My daughter has a house there and I like to watch the eagles fly and the clouds float by.

In my spare time I love to knit, crochet, sew or embroidery.

I really enjoy working with the reunion committee, helping to make our reunions just a little bit special! We have an awesome class and I am thrilled to call so many of you friends!

Art Dhallin

Thanks for asking for me to give you a 60 year review of my life!lol....Seems I am faced with the question of where to start and when to stop!

As a kid my whole life was centered around music, the accordion, and Connie Cox. One of my fondness memories was a performance at the old Grange Hall. I will forever remember at the close of evening we were all around a piano and Karen Tuttle was singing to the music.

My parents purchased a motel in Santa Cruz and we moved there at the close of my freshman year. I graduated from Santa Cruz high and proceeded to Cabrillo JC....Spent a couple of years there and transfered to Fresno State. After a year there I quit school and got picked up by the draft and spent some time reflecting on my life and future.

When I got back I was more focused on getting an education. Met a wonderful girl and got married in 1972had two children and was employed in the grocery industry. Both kids went to USC...one got a PhD in engineering and the other got a Masters in Nursing,

I retired from the retail foods at 54 and started restoring collector cars.....My wife likes to say that I have three loves. First my dogs, second my cars and she is always hanging in for third place!.....lol. I want to thank all for their efforts to stay connected and best wishes to all!

Ukiah Class of 1966

Jack Orme

Hi Linda,

Looks like I missed the deadline for the bio...

But if I didn't..here's a quick update..

Left Ukiah High School at the end of my Sophomore year and graduated from Santa Rosa High School. Then attended the Maritime Academy and after graduation served in Vietnam as an US Naval Officer.

Worked for ~45 years in the military defense industry.....

quite challenging and rewarding. During that time I met and work with some of the most intelligent, dedicated and senior military and civilian personnel in our country.

Married to my wife for 41 years. Living on the Sacramento River fishing and tending to my car collection. Grateful to be healthyEnjoying retirement!

Warm regards

Jack

Ukiahi Class of 1966

Michael Hall

"Michael is trying to escape his assisted living facility to attend his class reunion.
He will miss you all "
